Low Noise 7½-Digit Autoranging Multimeter

- 7½-digit resolution
- 100nV rms noise floor
- 7ppm DCV repeatability
- **Built-in 10-channel scanner** mainframe
- Dry circuit and low power méasurement mode
- 15 measurement functions including support for RTD and thermocouple temperature measurements
- **Built-in ratio measurement** function
- **GPIB and RS-232 interfaces**

Autoranging DMM

Model 1751 Safety Test Leads, User Manual, Service Manual

SERVICES AVAILABLE

2000-SCAN-3Y-EW	1-year factory warranty extended to 3 years from date of shipment
2001-TCSCAN-3Y-EW	1-year factory warranty extended to 3 years from date of shipment
2010-3Y-EW	1-year factory warranty extended to 3 years from date of shipment
C/2000-3Y-ISO	3 (ISO-17025 accredited) calibrations withi 3 years of purchase for Model 2000-SCAN*
C/2001-3Y-ISO	3 (ISO-17025 accredited) calibrations within 3 years of purchase for Model 2001-TCSCAN*
C/2010-3Y-ISO	3 (ISO-17025 accredited) calibrations withi 3 years of purchase for Model 2010*

^{*}Not available in all countries

The 71/2-digit Model 2010 Low Noise Multimeter combines high resolution with the high speed and accuracy needed for production applications such as testing precision sensors, transducers, A/D and D/A converters, regulators, references, connectors, switches, and relays. It is based on the same high speed, low noise A/D converter technology as the Models 2000, 2001, and 2002.

High Measurement Flexibility

The 2010 has 15 built-in measurement functions, including DCV, ACV, DCI, ACI, $2W\Omega$, $4W\Omega$, dry circuit resistance, temperature (with either thermocouples or RTDs), frequency, period, ratio, continuity measurement, and diode testing. This multi-functional design minimizes added equipment costs.

Creating a self-contained multipoint measurement solution is as simple as plugging a 2000-SCAN or 2001-TCSCAN scanner card into the option slot in the 2010's back panel. This "plug-in" approach eliminates the need for a separate scanner and significantly reduces programming and setup time in applications involving a limited number of test points. For larger applications, the 2010 is compatible with Keithley's Series 7000 switch matrices and cards.

Unique Resistance Measurement Functions

Characterizing the resistance, linearity, or isolation of contacts, connectors, switches, or relays completely and efficiently demands an uncommon combination of ohms measurement capabilities. The 2010 offers:

- Low-power obms measurement mode. Low-level resistance measurements can be made with source current as low as 100μ A, an order of magnitude lower than is possible with other DMMs, so device self-heating is minimized. Among other benefits, this low-power measurement capability makes the 2010 suitable for end-of-life contact testing per ASTM B539-90.
- Dry circuit test function. When measuring contact and connector resistances, it is important to control the test voltage carefully in order to avoid puncturing any oxides or films that may have formed. A built-in clamp limits the open circuit test voltage to 20mV to ensure dry circuit conditions.
- Offset compensated obms function. This function eliminates thermal effects that can create errors in low-level resistance measurements in system environments.
- Extended obms measurement capability. The 2010 provides a 10Ω range for more precise measurements of low resistances.

Optional Multiplexer Cards

Creating a self-contained multipoint measurement solution is as simple as plugging a scanner card into the option slot on the 2010's back panel. This approach eliminates the complexities of triggering, timing, and processing issues and helps reduce test time significantly. For applications involving more than 10 measurement points, the 2010 is compatible with Keithley's Series 7000 switch matrices and cards.

Model 2000-SCAN Scanner Card

- Ten analog input channels (2-pole)
- Configurable as 4-pole, 5-channel

TEMPERATURE NOTES

- For temperatures <-100°C, add ±0.1°C and >900°C add ±0.3°C.
- Specifications apply to channels 2–6. Add 0.06°C/channel from channel 6.
- Excluding probe errors.

GENERAL

POWER SUPPLY: $100\mathrm{V}\,/\,120\mathrm{V}\,/\,220\mathrm{V}\,/\,240\mathrm{V}.$

LINE FREQUENCY: 50Hz to 60Hz and 440Hz, automatically sensed at power-up.

POWER CONSUMPTION: 22VA.

VOLT HERTZ PRODUCT: $\leq 8 \times 10^{7} \text{V} \cdot \text{Hz}.$

OPERATING ENVIRONMENT: Specified for 0° to 50° C. Specified to 80% R.H. at 35° C.

STORAGE ENVIRONMENT: -40° to 70° C.

ALTITUDE: Up to 2000 meters.

SAFETY: Conforms to European Union Directive 73/23/EEC EN 61010-1, Cat II.

EMC: Complies with European Union Directive 89/336/EEC, EN 61326-1.

VIBRATION: MIL-PRF-28800F Class 3 Random.

WARMUP: 2 hours to rated accuracy.

DIMENSIONS:

Rack Mounting: $89 \text{mm high} \times 213 \text{mm wide} \times 370 \text{mm deep } (3\% \text{ in} \times 8\% \text{ in} \times 14\% \text{ in}).$ Bench Configuration (with handle and feet): $104 \text{mm high} \times 238 \text{mm wide} \times 370 \text{mm}$ deep $(4\% \text{ in} \times 9\% \text{ in} \times 14\% \text{ in}).$

SHIPPING WEIGHT: 5kg (11 lbs).
